Proposed Tax Rate Bill $(\$163,743 / 100) \times 0.26800 = \438.83

The Debt Service Tax Rate is the component of the adopted tax rate of a taxing entity that will impose the amount of taxes needed to fund the entity's debt service for the following year. The proposed tax rate does not include any taxes for operation and maintenance, only debt service of payment of bonds, which is not subject to rollback. These rates are calculated by dividing the total amount of taxes by current taxable value with adjustments as required by state law. Rates are given per \$100 of property value.
